

Tangra™ M

520-535W

N-type high efficiency half-cell mono module

30-year lifespan delivers 10-30% more power compared with conventional P-type modules

The natural lack of LID in the N-type solar cell can increase power generation

Excellent low irradiance performance

Better light trapping and current collection to improve module power output and reliability

Industry-leading, lowest thermal coefficient

Optimized electrical design and lower operating current for reduced hot spot loss and better temperature

Certified to withstand 2400 Pa of wind load and 5400 Pa of snow load

100% triple EL test, which greatly reduces the hidden cracks rate
